As a student in L2 Computer Science at Université Paris 8, I am currently seeking an internship to develop my programming and software development skills while gaining concrete professional experience.

Education

Paris 8 University

Bachelor in Computer Science & Video Game Studies

Paris, France
September 2024 - Present

- Relevant courses: Architecture and data structures, advanced imperative and functional programming, Algorithms, Video game development, Systems and networks, Object-oriented programming

NHSFB – National High School of Finance, Economy and Management

Sofia, Bulgaria
September 2019 – May 2024

- Specialization: Economics and Management
- Relevant courses: Statistics, Business management and economics

Projects

Development of a video game – Godot

Paris 8 University

University project

- Designed and programmed a platformer-type game in GDScript, in collaboration with another student.
- Implemented gamelogic, scenemanagement, and player-environment interactions.

Creation of assets for video game – Godot

Paris 8 University

University project

- Created visual and sound assets (tiles, entities, animations, music) and ensured their full integration in the Godot engine.
- Developed a creative approach combining graphics, animation, and sound.

Development of a complete game in GDScript

Paris 8 University

University project

- Programmed a Tetris-type game exclusively in GDScript, without using external assets.
- Managed game logic, collisions, score, and gameplay rules.

Programming a text-based dungeon game in C

Paris 8 University

University project

- Developed a text-based game in C with combat system, locked doors, and one-way paths.
- Used data structures and advanced conditional logic.

Development of a simple website in HTML

Personal project

Personal project

- Create a static website in HTML, applying the basics of content structuring and organization.

Programming a text dungeon game in C++

Personal project

Personal project

- Development of a text game to deepen my knowledge of C++ and to better understand code structuring and optimization

Additional information

Technical skills Languages: Python, C, C++, GDScript, HTML, OCaml, Prolog, GL4D Tools: Godot	Profile & Languages Languages : - Bulgarian (native language) - English (C2) - French (B2) Interests: Video games, drawing, baking, , guitar
